

In its 20 years in the deicer business, Cryotech's growth and reputation was built, and depends on, customer satisfaction and loyalty. Cryotech is known for consistently providing quality products with exceptional performance while limiting environmental impact. With customer needs as priority one, Cryotech has expanded into industrial markets.

Dedicated Customer Service and Sales Staff

At Cryotech twenty-four hour customer service is a must, because your needs do not always happen between nine and five. Cryotech makes sure you have the product and information necessary to do your job successfully.

Technical Assistance

Cryotech's technical team will answer your questions regarding material and equipment compatibility, product chemistry, product testing or any other questions that your staff may have.

Tank and Storage Solutions

Cryotech knows your needs go beyond just chemicals, so the staff will provide assistance with tank and storage solutions to ensure you have the inventory you need to run your operation smoothly.

Plant Capabilities and Expansion

Cryotech offers 200 acres of land available for development, the ability to store 250 railcars, dry and liquid processing equipment (including the unique Unipel technology), and considerable shipping ability from their Fort Madison, Iowa plant.

An ISO 9001:2008 and 14001:2004 Certified Company

ISO standards assures customers that products are consistently produced with high quality and low environmental impacts.

Production Sites and Terminals

Cryotech has over twenty-five terminals, 150 railcars, and five production sites across the United States and Canada. Its distribution system is the industry leader.

You can depend on Cryotech when technology, quality, customer service, and distribution systems matter most.

These products could be reformulated to meet your specifications and solve your current and future needs - contact Cryotech for details.

Cryotech CF7®

Liquid Potassium Acetate

Benefits:

- Proprietary blending process ensures storage stability
- Low temperature performance
- Indefinite shelf life when stored properly

Cryotech CMA®

Calcium Magnesium Acetate

Benefits:

- Value in more active ingredient per pound
- Spherical pellets are less dusty than granules
- Indefinite shelf life when stored properly
- No added corrosion inhibitors

Cryotech NAAC®

Sodium Acetate (Anhydrous)

Benefits:

- Anhydrous formula is more concentrated
- Value in more active ingredient per pound
- Spherical pellets are less dusty than granules
- Indefinite shelf life when stored properly

Cryotech XT360®

Bio-based fluid containing Susterra® propanediol*

Benefits:

- Reduces reliance on petroleum-based materials
- Requires less energy to manufacture than traditional petroleum-based glycol products
- Reduces greenhouse gas emissions

*Susterra® propanediol is a trademark of DuPont Tate & Lyle Bio Products Company, LLC
