

AGRICULTURE PRODUCTS

CONSIDER CRYOTECH

A world leader in acetate technology, Cryotech has been formulating, manufacturing, and marketing potassium acetate products since 1992. Cryotech's foundation remains intact – firmly footed in deicing/anti-icing products and technology, while looking to evolve and grow into new and exciting markets, like agriculture. Consider Cryotech a value-added supplier of potassium acetate. Providing products and support through working with partners most familiar in the industry.

POTASSIUM ACETATE

Potassium (K) is required by a growing plant to stimulate early growth, increase protein production, and activate enzyme and hormone systems within the plant. Potassium Acetate has proven benefits beyond other K sources for liquid fertilizer products. Acetate is the most common organic anion in nature, which leads to enhanced uptake and more efficient plant use of K.

- Safe, biodegradable volatility reduction agent with dicamba
- Low crop injury potential
- Results in lower phytotoxicity damage
- May be applied in a variety of ways

CRYOTECH PA50

- 0-0-24
- 50% potassium acetate solution
- pH range 7.5-8.5

CRYOTECH KAc60

- 0-0-29
- 60% potassium acetate solution
- pH range 8.0-10.0

CUSTOM BLENDS

- Made to order
- May be available upon request
