

# CRYOTECH NAAC®

## Shaker Jug

### Why NAAC?

Cryotech NAAC is the leading premium deicer because it is exothermic, releasing heat as it dissolves. Burning through the snow and ice pack, it breaks the bond with the surface to keep it snow and ice free. Its low working temperature and long residual holdover keeps it working longer.

### ALL-IN-ONE

- Ready to use for ramps, jetways, doorways, baggage handling areas, helipads, residential use, and more

### USER-FRIENDLY

- Ergonomic handle for easy transportation

### MAXIMIZE PERFORMANCE

- Hinged dispensing lid has slots built-in for efficient spread pattern to maximize performance and reduce over application that causes tracking
- Less product waste than other common application methods

### LIGHTWEIGHT & CONVENIENT

- Each jug weighs approximately 10lbs and covers more than 1000ft<sup>2</sup>
- Easy to use with simple storage and application technique

### NAAC PACKAGING

- 10lb Jug/4 per case
- 55lb Bag/40 per pallet
- 2205lb Bag/1 per pallet
- Bulk

# CRYOTECH NAAC<sup>®</sup> SHAKER JUG

## PRODUCT SPECIFICATIONS

### APPLICATION

- Apply early to prevent snow and ice from bonding
- Use normal stride and continuous steady sweeping motion to apply
- Shovel accumulation once bond is broken
- Re-apply when new accumulation shows first tendency to bond

### PRODUCT ADVANTAGES

- AMS 1431 certified for airside use
- Chloride free
- Less damaging to concrete, steel, and vegetation than common deicers
- Environmentally friendly
- Requires fewer applications than common deicers
- Active to low temperatures; 0°F (-18°C)
- Unique Unipel technology and spherical pellet shape ensure uniform size and optimal performance of each pellet

### STORAGE AND HANDLING

- Store in sealed, original container with lid securely closed
- Convenient packaging is ideal for small spaces and compact storage at end of jet bridges and doorways
- Avoid excess moisture
- Preserve integrity of pellet by not overhandling
